About This Game

By word, by book, the tales of the brave and mighty are told in reverie. Every warrior is remembered, his stories spreading like a magician's flame. But, what happens after the story? Where does the hero go after slaying the dragon, rescuing the damsel and freeing the people from an untold terror? No one really knows what happens to the old and retired soldiers. They listen of course, to the very far fetched stories that are passed down from mouth to mouth. Where? In the very taverns that are bustling with legends and the young at heart.

After years of roaming free, slaying evil and merrymaking in halls of drink, everyone takes an arrow to the knee. They have obligations and duties but most of all, the retired life is boring and redundant. They miss the dangers and wish they were young again. What better way to relive the life than to run a tavern? Travellers and adventurers from all kingdoms, far and wide come aspiring for fame and glory. They tell tales of their adventures, transforming cotton tails to horrendous beasts, morphing storms

to witchery! All the danger relived in safety because at the end of the day, the warmth still burns in the fireplace.

Your job is to run the tavern - Dragon's Hangover. Some will seek drinks and food while some might seek the warmth of a bed. Manage your tavern and be the host that all adventurers admire. Your journey, as the tavern's keep, begins now.

Title: Tavern Tycoon - Dragon's Hangover

Genre: Indie, Simulation, Strategy

Absolutely amazing game. Well worth my money! Highly addictive as well.

It's amazing that it's only 1 person that created this game. There is some improvements than can be made.

Can we have the facility to upgrade rooms and furniture? Maybe paint the walls or something to improve on interior?

Is there also a way where if we click on a member of staff under 'Manage: that the screen focuses on the specified staff?

Despite my suggestions, I still love the game. Love It!!!!. Its literally Theme Hospital but a Tavern instead, It lacks the polish Theme Hospital had but its still great fun.. still needs a lot of work.. I was in a mood for a tavern manager sim game and Tavern Tycoon did not disappoint. Like others have said, it feels a lot like Hospital Tycoon (I remember it from MANY years ago) Its very well made and looking forward to all the content they regularly update with. I adore the different themed maps with each scenario and it also lets you play Endless mode with a page of custom settings you can make.

With that said, I do have some points to cover. This game can tend to get glitchy if you have a pretty massive tavern in Endless mode, but I never had much issues when going thru scenarios which IMO the scenarios alone made this game worth the price. As others have mentioned handyman stop cleaning, certain rooms just dont get used etc. It seems the game can get quite overloaded at that point and all the different algorithms start to confuse each other. All in all I think its a great game, very well made, just needs some touch ups in the code & guts.. A relatively solid tycoon fashioned after the old-school classics, Tavern Tycoon is still a bit rough around the edges but well worth the price. The graphics are a bit dated and clunky but carry a lot of character to make up for it. My only real complaint is that the punishment for a lack of research is too extreme and too early.
